DETAILED ACTION

Allowable Subject Matter

Claims 1-3, 5-11, and 13-29 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a method and system for controlling access to shared documents. Each independent claim identifies the uniquely distinct features "calculating said conversational frequency patterns for a selected user from data stored in a first database; calculating access of systems, applications, or documents by said selected user; finding other users from a second database; obtaining a list of systems, applications, or documents utilized by said other users but not by said selected user; and granting or withdrawing access to said selected user". The closest prior art, Adams (US 20020124053), discloses a conventional method for controlling access to shared resources fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
